

Daikin Perfera is a test winner at ‘Stiftung Warentest’

Vienna, June 2025 – Split air conditioner receives top marks in Stiftung Warentest comparison test: The wall-mounted unit Daikin Perfera (model FTXM35A + RXM35A) was named one of the two test winners among 3.5 kW cooling capacity units in the latest split air conditioner test by Stiftung Warentest (issue 06/2025). It received a quality rating of ‘GOOD’ (2.2), placing it at the top of the test field.

The unit was particularly praised for its high energy efficiency in both cooling and heating, solid air distribution, and overall good environmental performance. In the "Environmental Properties" test criterion, which accounted for 40% of the overall rating, the Daikin Perfera scored ‘GOOD’ (1.9). It also received ‘GOOD’ (2.0) for cooling performance and ‘GOOD’ (2.4) for heating. The annual climate impact from electricity consumption and the R-32 refrigerant was rated comparatively low.

Additionally, Stiftung Warentest noted the unit’s overall **good usability**, including operation via the **Daikin Onecta app**, and its **whisper-quiet operation** (19 dB(A)). The Daikin Perfera features **advanced filtration technology** to improve air quality: the patented **Daikin Flash Streamer technology** eliminates odors and deactivates allergens. Test results confirmed it inactivates over 60 types of pollutants such as bacteria, allergens, and viruses – including the influenza virus. (See also [Perfera wall-mounted air-to-air heat pump | Daikin](#))

With the help of an **motion detection sensor**, the airflow is directed to areas where no people are present. If no one is in the room, the unit switches to energy-saving mode. Thanks to its modern, discreet design, the Daikin Perfera wall unit blends harmoniously into any living environment.

With the Perfera, Daikin offers an **air-to-air heat pump** that is suitable **for energy-efficient cooling and heating**, making it a **cost-effective solution** for residential use – especially in light of increasing energy efficiency and climate protection requirements.

About

100+ years Daikin

The story of Daikin has always been shaped by groundbreaking ideas, technological innovations, and dedicated people. It began in 1924 when the young Japanese engineer Akira Yamada founded an enterprise in Osaka to manufacture aircraft radiators with a 15-member team. More than 100 years later, the Daikin Industries group brings **future-proof solutions for heating, cooling, ventilation, air purification, and refrigeration (HVAC-R) to global markets**. 103,500 employees in 173 countries continue the company's legacy of leading technologies to advance low carbon heating and cooling, while ensuring the highest level of comfort.
